

Welcome to the first Conti Tech sessions. By the end of this session you will:

- Know what Dropbox is
- Create a Dropbox account
- Create a folder on Dropbox
- Share the folder from your desktop and from the web
- Sync files from you PC and from the web
- Add computers to Dropbox

### What is Dropbox?

It is a folder that synchronizes your files online and makes them accessible on all your devices.

There are 2 parts to Dropbox: **Dropbox application** that you can download from app store or from the Dropbox website and the **Dropbox web interface** that you can access by going to

[www.dropbox.com](http://www.dropbox.com)

All information about Dropbox will be available on the Tech at conti wiki

<http://techatconti.wikispaces.com/> and by going to the Dropbox page

<http://techatconti.wikispaces.com/Dropbox>

You can scan these codes to access the above 2 pages respectively:

Tech at conti wiki

Dropbox page

To scan the Qrcode you will need a **Qrcode reader application** installed on your smart phone or tablet. Lots of free ones can be found on the internet.

For your convenience a guide will be given to you during this session a copy of which is also available on the wiki.
